

AI-ASSISTED DEVELOPER

Loganadan Arunda Ishara

I like building things that work, and understanding why they do.

PROFILE

Responsible and hardworking, with a steady, practical approach to problems. I like to understand how things work and to see a task through to a result that actually holds up. I learn by doing, ask when I'm unsure, and don't leave a problem half solved.

EDUCATION

G.C.E. Advanced Level · Physical Science
St. Aloysius College, Galle · Results C, C, S

G.C.E. Ordinary Level
St. Aloysius College, Galle · Results A5, B3, C1

English Language Course
British Council · Level B1

EXTRACURRICULAR

Co-founder and Treasurer · Aloysius Plus

2023 – 2024

- Co-founded the official web team, managed its budget, and directed social media content and media coverage.
- Ran team operations and digital strategy.

PROJECT

iLike

`ilike.ilike-team789.workers.dev`

A social app concept for finding people who share your interests. Users get profiles, interest circles, photo posts and chat, all running on a Supabase database. I built it with AI tools as an installable web app that works on both phone and desktop.
